

# GRILLE

PREMIER CONCEPTS | DATA SHEET

The Premier Concepts Grille features a panel that is manufactured in our North Carolina facility. These panels can be installed on ceilings or walls and utilizes our patent pending attachment system. While we do offer standard specifications, these panels are fully customizable to fit your project needs. Our design allows for full panel access by removing screws hidden in reveals. Custom access options can be fabricated.

## ACCLIMITIZATION

Required before installation

Relative humidity: 25 - 55% | Temperatures: 50° - 86° F

## FIRE PERFORMANCE

Can be treated to meet Class A as per ASTM E-84. Veneers are applied to a FR (Fire Related) core (typically MDF or Particleboard).

## SUSPENSION

Patent pending, notched backer cleats

## SYSTEM WEIGHT

Typically weigh 2-4 pounds per square foot

## ACOUSTICS

Grille panels can enhance acoustics via sound absorbing insulation placed over open reveals within the T-Bar grid. Insulation is typically provided locally.

## MATERIALS

Wide range of solid wood, veneers & laminates

## FINISHES

Standard clear & matte - custom available

## SUSTAINABILITY

Custom fabricated for your project. Contact sales to find out if your project qualifies for LEED credit opportunities.

## SEISMIC

Grille Open meets code compliance via direct screw attachment to heavy duty grid. Local code should be consulted to determine additional seismic requirements.
